

ScreenGuard™ | Extreme
Stainless Steel Security

Take your security to the next level with ScreenGuard Extreme stainless steel mesh security system

Engineered for Strength. Tested for Compliance. Built for Australia's Toughest Mining Environments.

Designed to help safeguard site compounds, accommodation, control rooms and operational facilities from extreme weather and windborne debris while maintaining airflow and visibility.

ScreenGuard Extreme is tested to Australian Standard AS5039, providing protection against intruder attacks and extreme weather including cyclone.

ScreenGuard™ | Extreme

Stainless Steel Security

ScreenGuard Extreme is manufactured using heavy-duty 1.2mm high-tensile 304 stainless steel woven mesh, delivering exceptional impact resistance and long-term durability.

Combined with our proprietary WedgeMax™ retention system, every ScreenGuard Extreme screen is engineered to exceptional strength and reliable performance in demanding mining environments.

Maximum Protection Against Windborne Debris & Cyclone Conditions

Designed for remote mining operations exposed to severe weather, ScreenGuard Extreme provides an additional layer of protection for building openings during high winds and cyclone events.

The robust screening system provides an additional layer of protection for site compounds while maintaining airflow and natural ventilation, making it ideal for mining camps, administration buildings and operational facilities.

Ideal for:

- Mining accommodation
- Site offices
- Control rooms
- Workshops
- Amenities buildings
- Compound buildings
- Remote operations facilities

Compliance Standards

ScreenGuard Extreme has been independently tested to Australian Standards and offers a reliable screening solution designed for long service life with minimal maintenance.

- Tested to **AS 5039:2023** - Australia's benchmark standard for security screens
- Engineered to meet the wind loading requirements of **AS/NZS 1170.2:2021**

Backed by a 10-Year Warranty

Engineered to perform in demanding industrial environments, each ScreenGuard Extreme system is custom manufactured to suit your mining project requirements and integrates seamlessly into new or existing facilities.

Built with premium materials and engineered for long-term performance in demanding mining environments, ScreenGuard Extreme is backed by a comprehensive 10-year warranty.
